Subject: Red Leaf Resources and Oil Shale
Attachments: Applicability of Stormwater for Oil shale and Tar Sands.pdf; ipaa_response.pdf; Red Leaf Resources Process Presentation.pdf; Letter from Red Leaf_They Are Exempt.pdf; Oil Shale air discussion_17July2013.pdf; Oil Shale air discussion_18July2013.pdf; Red Leaf Project Outline from Jay Vance_12July2013.pdf

Following are activities related to oil shale and Red Leaf Resources.

Attached are:

1. EPA's two memos which describe the Energy Policy Act stormwater exemptions as they relate to Oil Shale
2. Two files documenting discussions that I had with Jay Vance at Red Leaf Resources on July 17 and July 18, 2013
3. A letter sent to EPA from Jay Vance in which they determined that they do not need a permit for stormwater discharges.

Two additional notes:

1. I provided this information to the Bakken Workgroup as a general update, where it was confirmed that Red Leaf Resources was in contact with the air program regarding permits needed for their oil shale activities.
2. A team from Red Leaf Resources met with managers and technical representatives from RCRA, ORC, TAP, air monitoring, air permitting, and NPDES in 2007 to discuss their process and potential permitting concerns. That meeting was arranged through the air program. I don't have notes specific to that meeting.
